

How to use the Race Across America Route Book

The three thousand mile route designed for the 2017 Race Across America is divided into 55 sections with a designated Time Station at either end. Sections average about 56 miles (90 km) in length with one in Arizona approaching Flagstaff over 100 miles long. Time Stations are defined as specific locations, frequently highway intersections, at which the racers' times are reported to race headquarters by the Crew. Some of the Time Stations are staffed by volunteers there to provide information, help and other services appropriate to the location. They may be set up anywhere within visual range of the timing location designated in the Route Book where they can best provide their services, usually close to the timing point preferably the right side shoulder or curb of the route highway.

With the exception of special pages covering start procedures each route section is specified in detail on two facing pages of the Route Book. On the left hand page is a topographic map of that section with detailed inserts to clarify places where several turns occur close together or where other amplification is considered useful. Below the map is an elevation profile of the route in that section. Be careful to note the vertical elevation and horizontal terrain mileage scales of these charts as each is adjusted to fill the same space on the page. Distances are in US statute miles following the route terrain similar to measuring with a precision odometer. Elevations are in feet above the WGS 84 datum sea level.

The right hand page contains the specific instructions for following that section of the route in tabular format. Column headings are: **ref**, **mile**, **turn**, (description), and **elevation** and are explained in the following paragraphs.

ref A reference designation assigned in sequence to each line in the instructions which specifies action at that particular location.

- Time Station **ref** designations are TS01 through TS55.
- “Turns” have **references** starting with two digits for the number of the next Time Station ahead followed by a letter which allows you to put all the turns in a section in proper sequential order. After this is a hyphen (dash) followed by a one or two letter abbreviation indicating what the Route Book directs you to do at this location. There aren't many choices: an L or an R suggests a left or right turn of about 90 degrees or more whilst BL and BR refer to turns which are less than 90 degrees (bear or bend left and bear right). An S means to go straight and is seldom used except when the road you are on turns but the intent is for you to continue in a more or less straight direction onto the connecting road or some other unusual situation may tempt you to turn where none is required.
- These **ref** designations are useful cross **references** between the Route Book and points displayed by a GPS receiver on a bike or in a vehicle or shown on the screen of a computer running mapping software. In addition the **ref** designation is also handy in communications, both with your Crew and with Race Headquarters. “We are three miles before 36F.” immediately conveys a complete Route Book **reference** without worrying about page numbers or location names. Similarly should a racer be proceeding alone and carrying a handheld GPS receiver to count down the distance to the next turn, the name (**ref**) of the turn, if the gadget can display it, tells him in simplest terms what to do when he gets there. You will probably find other uses for the convenient **reference** label in coordinating racer support.

mile Every instruction in the Route Book refers to a location along the route. The mile number is the odometer or terrain distance along the route since the previous Time Station.

- For this number to be most useful the driver must remember to rezero the trip odometer of his vehicle at each Time Station and then realize that if the vehicle has to depart from the specified route (stop for gas or whatever) the odometer may no longer correspond to the miles indicated in the Route Book.

- For convenience, those miles which correspond to **referenced** turns or other action are in **boldface (dark) print**. It is recommended that crews also use colored highlighter pens to further emphasize these points. Missing a turn can ruin your whole day by immensely annoying the cyclist.
- If two lines of instruction refer to points less than .1 mile apart the second will normally have “**Imm**” for “immediate” in the mile column or perhaps “1 blk” for one city block (the distance to the next intersection).

turn This column contains the spelled out **LEFT, RIGHT, br LEFT, br RIGHT**, and **straight** instructions abbreviated in the **ref** key and they are also in **dark print**.

- The first entry in each section uses a compass heading to indicate in which direction you should go when leaving a Time Station and will often be “**East**” or “**Northeast**” but not always. Time Stations which are set at intersections can be confusing so this indication is there to help in addition to the comments in the directions column.
- All other entries in the turn column are in faded (light) printing and are the miles remaining until the next turn. To emphasize that no action is to be taken the word “straight” may appear in light print in the turn column without resetting the countdown to the next turn. This may happen when there is an intersection at which the route appears, through differences in paving or traffic, to turn but in fact does not.

elevation This is the surveyed altitude above sea level of the point and is provided to help anticipate climbs and descents.

- A **referenced** turn has a listed elevation as do other points which mark the start and top of significant climbs even if the location itself, often a creek, has no road sign or other means of identification.
- This number will not often agree with GPS data within 30 feet due to the inherent variability of satellite locations and their orbital geometry but the difference between numbers in the elevation column of the Route Book represents the real world as it is in published topographical data.
- You are cautioned against using the elevation number together with whatever the GPS unit displays all by themselves to determine where you are along the route.

(description) The main column on the right hand page contains the amplifying information for turns, the names of streets at highway junctions, and the like. Also suggested lane changes for turns ahead may be included but need not be strictly followed. As long as you stay on the specified route, whatever lane or shoulder, you are riding according to RAAM rules but you must also realize that local police and traffic controls, even if temporary, by rule take precedence over the Route Book and any conflict should be reported to headquarters, particularly if you wish a delay to be considered worthy of a time credit.

Sometimes additional information is included in italics to help crews avoid getting off the route or where traffic or other hazards are expected. However it is important to remember that no roads have been closed nor normal traffic flow diverted for the passage of RAAM racers and vehicles and that permanent or temporary “road furniture” may be anywhere.

There are some standard abbreviations like “Jct” for a road junction, intersection, or interchange and those associated with street names like Rd, St, Ave and the like. When associated with a highway “Bus” refers to the business route, not public transportation.

In the US a “roundabout” is normally referred to as a “traffic circle” or “rotary” and additional information may be provided where one is found at a route turn since a route LEFT turn may be accomplished by a right turn into the circle and another right turn to exit from it after going about three quarters of the way around.

A US highway is indicated by its numerical route number such as US 56 E for US highway 56 going east. A state road would be referred to as SR 252 and so forth regardless of what state it is in. CR indicates a county road, IR an Indian reservation road. Many of the roads RAAM follows have multiple national, state, and regional designations as well as a local town name. The most conspicuous will be listed together in the directions, e.g., “**US 37 E/SR 54 N/Main St**”.

On an instructions line the road which is part of the RAAM route at that point is in **dark (boldface) print**.

Intersections where actions are required often have the following abbreviations to help you identify them:

- **TL** (traffic light)
- **yTL** (flashing yellow caution light)
- **rTL** (flashing red stop light)
- **T** (a three way “tee” intersection)
- **SS** (a stop sign in our direction)
- **4SS** (stop signs in every direction, “all stop”)

This information is seldom included for junctions where we take no special action but of course every traffic control sign, light or other device must be obeyed according to RAAM rules as well as local laws.

Most railroad crossings are indicated by **(RR)** and by state and federal law must have warning signs. Livestock control grates are sometimes real and sometimes just paint on pavement but only the real kind are listed using **(CG)**. Others, real or just paint, should be anticipated as surely as the animals they try to control or any other hazard in the road. Similar structures used to allow water in normally dry creek beds to cross the highway without flooding but are listed as **(CG)** regardless of their function. These are sometimes temporary and are eventually replaced by culverts or other drainage measures.

There are many terrain features identified for which there will be no highway signs or other markings. Most of these are included either to mark the start of a climb (frequently a creek bed) or its end. A few other unmarked features which should be apparent to Racers and follow vehicles, such as bridges across small waterways, are included to help track progress.

At the bottom of each right hand page are spaces for recording the time of the racer’s arrival as reported to headquarters and the confirmation number received back from headquarters as evidence that the report was accepted.

Detours/Alternate Routes:

Between the start and the point in the desert where restrictions on support vehicle use of the route are lifted (about 31 miles past Time Station 1) there are several routes provided. The one for the bicycle racers must be strictly followed and since crew support is not present the racers should each have with them the copy of the instructions for that part of the route, included in the Route Book as a tear out page, and know how to interpret them.

A suggested route for the follow vehicle to rendezvous with the racer is provided but need not be followed as long as no crew support vehicles are on the route for the first 23 miles which is almost 16 miles past the bike path parade end.

Special attention must be paid the restrictions on the size and number of support vehicles for solo and team racers between Time Station 1 and the desert floor since use of the “glass elevator” rapid downgrade by large vehicles is prohibited in the race rules and experienced mountain cyclists may indeed be trying to go considerably faster than all motorized vehicles with no really safe opportunities for anyone to pass anyone else, other than perhaps two daredevils on bikes. A suggested alternate route is offered for RV’s and other vehicles not permitted on the

course or to use the glass elevator to get from the race start to the rendezvous point on the desert floor. RV's longer than 40 feet may not be able to use this or other suggested large vehicle bypass routes elsewhere in the Route Book.

Several (about a half dozen) other "alternate" routes on the way east are described to allow large vehicles to avoid prohibited use of narrow mountain roads (Arizona), low clearance obstacles (Missouri and Pennsylvania), and congested pedestrian areas (Indiana and Ohio). Each of these is indicated in the remarks at the top of the associated instructions page with details in a box at the bottom of the same page.

Time Stations:

Every effort has been made to locate time stations to meet the needs of the crews.

RAAM has no business or other commercial relationship with Wal-Mart Stores, Inc., however where possible Time Stations are placed at this company's always open (except on Christmas Day) large discount stores, called Supercenters. Of particular advantage to RAAM crews are the large lighted parking lots, which welcome RV's, plus the core merchandise and grocery products on offer at almost all locations which are consistent in quality, price, and, again to the particular benefit of a time pressed crew, store product placement. Walmart stores also maintain high standards of restroom cleanliness, of interest to those not traveling in motorhomes.

Second to Walmart as effective Time Station locations is the McDonald's restaurants franchise chain which offers their unfiltered and unsecured Wi-Fi hotspot internet access at most locations without cost or membership so that crews can keep up on race status and take care of email and web postings. Again, RAAM has no business relationship with McDonald's Corporation so our racers and crews are simply their customers.

At a few Time Station locations there may not be any of the amenities such as would be expected at Walmart, McDonald's, or a 24 hour gas station. Sometimes the Route Book directions offer suggestions to top off on fuel and provisions before embarking on a long section without 24 hour services at Time Stations along the way, but crews are advised to plan to be self-sufficient through every night regardless of where they are on the course.

Look ahead!

It is always prudent to plan at least one Time Station ahead and carefully look over the next page of instructions. Many times a Time Station has been placed at a turn in the route. That turn may appear on the page for that time station or at the start of the next page. Don't make the mistake of letting your Racer proceed on his own during the day and possibly missing a turn while the follow vehicle stops to use the public facilities.

Route changes:

While there were no road closures found during the most recent route check which would prevent a racer and follow vehicle from safely following the route or an identified detour around a work area, always be ready to adapt to unexpected pavement conditions. If a road closure blocks the race route headquarters will provide instructions about how to proceed when the crew calls in to report arrival at a preceding time station. Only Race Headquarters, or a Race Official distributing instructions on behalf of HQ, can authorize a racer to depart from the route specified in this book without a penalty or risk of disqualification.

RACE ACROSS AMERICA 2017

Follow/Support
Vehicle Routes

Recommended Follow/Support vehicle routes.

< Check Section 13 of the RAAM Rules >

These are suggested routes from Oceanside to the Follow Vehicle staging area east of I-15 and the Support Vehicle staging area in Borrego Springs.

| <u>mile</u> | <u>turn</u> | RECOMMENDED BYPASS ROUTE FOR <u>FOLLOW VEHICLES ONLY</u> |
|-------------|-----------------|--|
| 0.0 | North | The Strand. <i>Distances measured from the Pier.</i> |
| 0.4 | RIGHT | SS: Surfrider Wy. |
| 0.6 | straight | 4SS: Cleveland St. <i>Racers turn left here, follow vehicles continue straight.</i> |
| 0.7 | LEFT | TL: Coast Hwy , REZERO YOUR ODOMETER AT THIS TURN!!! |
| 0.0 | | continue north on Coast Hwy with rezeroed odometer |
| 0.2 | br RIGHT | SR 76 E toward I-5 (just before the TL) |
| 0.9 | | 9.0 TL: Loretta |
| 6.6 | | 3.3 TL: College Ave |
| 9.9 | RIGHT | TL: Vista Way |
| 10.9 | LEFT | Gopher Canyon Rd , cross under I-15 |
| 15.6 | RIGHT | TL/T: Old Hwy 395 |
| 15.8 | LEFT | TL: Old Castle Rd , <u>Valley Center</u> |
| 16.0 | Wait | Old Castle Trading Post site (on right), Follow Vehicle Staging Area Directions resume at the top of the "Start to TS1, continued" page |

| <u>mile</u> | <u>turn</u> | RECOMMENDED BYPASS ROUTE FOR <u>ALL OTHER SUPPORT VEHICLES</u> |
|-------------|-----------------|--|
| | | <i>Oversized support vehicles: Contact race officials for instructions and permission to use an alternate route around the steep/winding Banner Grade east of Julian.</i> |
| 0.0 | East | Start: Mission St eastbound at Coast Hwy |
| 0.1 | | 0.3 TL: Ditmar Ave |
| 0.4 | br RIGHT | I-5 S on ramp toward San Diego, merge onto I-5 S |
| 2.5 | br RIGHT | off ramp 51B toward SR 78 E/Escondido, merge onto SR 78 E |
| 19.3 | | 1.1 under I-15 (after <u>Vista</u> , <u>San Marcos</u>) |
| 20.4 | RIGHT | TL: Broadway/SR 78 E (follow signs for SR 78 E through <u>Escondido</u>) |
| 20.8 | LEFT | TL: Washington Ave/SR 78 E toward Ramona |
| 21.8 | RIGHT | TL: N Ash St/SR 78 E , becomes San Pasqual Valley Rd |
| 38.5 | LEFT | TL: Main St/SR 78 E toward Julian (in <u>Ramona</u>) |
| 53.9 | straight | Jct SR 79 N, stay on SR 78 E (in Santa Ysabel) toward Wynola |
| 60.6 | RIGHT | 4SS/T: Main St , turn to stay on SR 78 E (in <u>Julian</u>) |
| 60.9 | straight | Jct S 79 S, stay on SR 78 E (before steep winding descent) |
| 72.2 | straight | Jct CR S2 S then Jct CR S2 N (at bottom of steep winding descent) |
| 79.2 | LEFT | CR S3/Yaqui Pass Rd toward Borrego Springs |
| 85.8 | br LEFT | Deep Well Trail , turn to stay on CR S3 toward Borrego Springs |
| 86.2 | LEFT | SS: Borrego Springs Rd , turn to stay on CR S3 , Borrego Springs |
| 91.3 | Wait | Jct Christmas Circle, Support Vehicle Staging Area Directions resume at the top of the "Start to TS1, continued" page |

Reminder: Absolutely no support vehicles may drive on the race course west of I-15. Only the primary follow vehicle (and primary shuttle vehicle for teams) may drive on the race course west of Borrego Springs (midway between TS 1 and TS 2). **[RAAM Rule 1400]**

235.1 miles so far: 2,834.2 miles to go

RACE ACROSS AMERICA 2017

TS 3 to TS 4

Blythe, CA to Parker, AZ

The course follows the Colorado river northward until the first bridge where we cross into Arizona. We start north on California State Route 95 and end up going south on Arizona State Route 95. On the Arizona side of the river we will be on the Colorado River Indian Reservation.

No direct follow during daylight hours in Arizona until 60 miles past Time Station 9. (Rule 1405.2)

| <u>ref</u> | <u>mile</u> | <u>turn</u> | <u>elevation</u> |
|------------|-------------|--|------------------|
| TS03 | 0.0 | East Continue east on E. Hobson Way , right turn out of shopping area at TS 3. | 269 |
| 04A-L | 0.9 | LEFT 4SS: SR 95 N/N Intake Blvd. Sign to Needles after turn. | 266 |
| | 7.4 | 27.2 Cross the Main Canal Levee, leave irrigated farmlands. | |
| 04B-R | 34.6 | RIGHT Agnes Wilson Rd/ IR 18 . Sign: "Wilson Road River Crossing" | 426 |
| | 37.3 | 2.6 Colorado R. Enter ARIZONA . Mountain Standard Time is the same as Pacific Daylight Time. Begin no direct follow during daylight hours. | |
| 04C-L | 39.9 | LEFT rTL/SS: Mojave Rd/IR 1 Rd | 335 |
| 04D-L | 48.6 | LEFT yTL: 2nd Ave., Parker . | 364 |
| | 49.7 | straight 2nd Ave becomes W Agency Rd . | |
| 04E-R | 50.9 | RIGHT TL: SR 95/S California Ave <i>See note below</i> . | 420 |
| TS04 | 51.4 | TS 4: Circle K on right. | 417 |

There are limited 24 hour services from TS 4 to TS 7. Crews needing provisions for the next 150 miles may want to take advantage of the Walmart Supercenter always open at 100 Riverside Dr. Go straight for .5 mi instead of turning at 04E-R.

There is also limited mobile device/ cell phone service from here to TS 7 in Prescott. Try to make your TS arrival reports while at the time stations or in populated places.

Arrival time/conf#: _____ / _____
Time Station 4: Parker, AZ

286.4 miles so far: 2,782.8 miles to go

RACE ACROSS AMERICA 2017

TS 4 to TS 5

Parker, AZ to Salome, AZ

Here we leave the Colorado River valley irrigated agricultural land and slowly but steadily climb back up to the lower desert of southern Arizona. There will be few nighttime services from here to Prescott about 150 miles ahead.

No direct follow during daylight hours in Arizona until 60 miles past Time Station 9. (Rule 1405.2)

| <u>ref</u> | <u>mile</u> | <u>turn</u> | <u>elevation</u> |
|------------|-------------|---|------------------|

Arrival time/conf#: _____ / _____

Time Station 9: Flagstaff, AZ

602.9 miles so far: 2,466.4 miles to go

RACE ACROSS AMERICA 2017

TS 9 to TS 10

Flagstaff, AZ to Tuba City, AZ

Don't leave Flagstaff without enough good drinking water to last 280 miles to TS 14 in Cortez, CO.

Dangerous traffic likely as you leave Flagstaff. High desert scenery: vegetation diminishes as the road drops and the brown, yellow, red, white, and gray colors of the cliffs dominate the views. Many elk warning signs early in this section. At about mile 42 the race enters the jurisdiction of the Navajo Nation and local clocks shift from Mountain Standard to Mountain Daylight Time. We will be the guests of various tribes almost all the way to TS 15, Pagosa Springs, Colorado. Be respectful of their culture.

There is no direct follow during daylight hours until mile 64.9. (Rule 1405.2)

| <u>ref</u> | <u>mile</u> | <u>turn</u> | <u>elevation</u> |
|------------|-------------|---|------------------|
| TS09 | 0.0 | Northeast Continue on E Huntington Dr , right turn from Walmart parking areas. | 6844 |
| 10A-L | 0.5 | LEFT TL: S 4th St | 6876 |
| 10B-R | 0.8 | RIGHT TL: US 89/Route 66/I-40 Bus. Lots of highway names, lots of traffic. | 6860 |
| 10C-S | 2.2 | straight TL: Follow US 89 N toward Page. <i>Do not take US 66 toward I-40 and I-17.</i> | 6825 |
| | 4.6 | 60.3 Townsend/Winona Rd. | |
| | 9.6 | 55.3 Black Bill Park at Firehouse Ln. Commence climb. | 6708 |
| | 15.0 | 49.9 11,200 ft Rees Peak (west); Sunset Crater National Monument (east). Start descent. | 7285 |
| | 26.4 | 38.5 Leave Coconino National Forest and enter the Wupatki National Monument. | |
| | 29.4 | 35.5 Leave the Wupatki National Monument. | |
| | 41.2 | 23.8 Black Mesa Pump Station Rd. Rate of descent increases. | |
| | 42.1 | 22.9 Enter the Navajo Indian Reservation. Mountain Daylight Saving Time = RAAM race time - 2 | |
| | 44.5 | 20.5 Jct old US 89. Short break from the descent. | |
| | 49.2 | straight Jct SR 64. Reservation trading posts. Continue on US 89 N toward Page. | |
| | 51.0 | 14.0 <u>Cameron</u> . Historic Cameron Trading Post (on left). Cross the Little Colorado River. | 4120 |
| 10D-R | 64.9 | RIGHT T: US 160 E "Navajo Trail" toward Tuba City. Cross Hamblin Wash. Begin a short climb. | 4461 |
| | | Begin MANDATORY direct follow at all times until Time Station 12. (Rule 1405.2) | |
| | 66.9 | 8.1 Top of the mesa. | 4699 |
| | 75.0 | 0.0 <u>Tuba City</u> . Jct US 160 and SR 264/IR 101. | |
| TS10 | 75.0 | TS 10: Tuuvi Travel Center. | 4823 |

Don't be confused by the clocks in Tuba City. Navajo tribal offices and schools observe Mountain Daylight Time (RAAM time - 2 hours), while most businesses do not to conform with the Hopi Indian lands immediately to the southeast.

Time Station 14: Cortez, CO

884.2 miles so far: 2,185.0 miles to go

RACE ACROSS AMERICA 2017

TS 14 to TS 15

Cortez, CO to Durango, CO

Leaving Cortez, the course heads into the heart of the Colorado Rockies, the San Juan Skyway, with two warm-up climbs. Elk warnings return. Generally, wide roads with good shoulders and moderate traffic.

The route is now getting into the serious climbing of the Rocky Mountains. Here live some of the best, most skillful, and fastest automobile drivers in the country. At night they will see your unusual lights and perhaps give you extra room while wondering what you are up to. At dusk, dawn, and during rush hours they are less likely to see you before blowing by too close for comfort. Crews protect your racers!

There is no direct follow during daylight hours in Colorado. (Rule 1405.2)

All Racers must stop at TS15 Checkpoint until cleared to proceed by Checkpoint volunteers.

| <u>ref</u> | <u>mile</u> | <u>turn</u> | <u>elevation</u> |

1,778.8 miles so far: 1,290.5 miles to go

RACE ACROSS AMERICA 2017

TS 30 to TS 31

Fort Scott, KS to Weaubleau, MO

The road narrows in Missouri. Follow US 54 E for this entire section. After entering Missouri 50 to 100 ft rollers start and grow throughout the section, but stay in the elevation range of 700 to 1000 ft.

Once past Nevada you'll know you're not in Kansas anymore! The route will stop seeming to be one dimensional, straight ahead and flat forever, but will begin to wander in all three. If you recall Colorado drivers in the mountains, here the scale is less grand but curves more abrupt, climbs and descents short but steeper, and traffic may seem a lot faster in these closer quarters often with little opportunity to get out of the way. From here to Time Station 35 the local folks seem determined to get where they're going without delay. Don't allow your racer to impede other traffic. Not only is it dangerous but it's also against RAAM rules. Look out for yourself and your racer's safety as if someone's life hangs in the balance.

RACE ACROSS AMERICA 2017

TS 44 to TS 45

Athens, OH to West Union, WV

This section is over **85** miles long with some **11,000 feet** of climbing!

The terrain moderates for the rest of Ohio but once into West Virginia and past Parkersburg the most difficult climbing in RAAM begins. The altitude doesn't approach that of the Rocky Mountains but the climbs are relentless. There is more elevation gained in this section than any other time station segment anywhere from coast to coast but the most difficult measured in feet of climbing per mile ridden is still ahead between Cumberland and Hancock in Maryland.

| <u>ref</u> | <u>mile</u> | <u>turn</u> | <u>elevation</u> |
|------------|-------------|--|------------------|
| TS44 | 0.0 | East Continue east on Bus US50 / E State St , right turn from Walmart parking. | 613 |

RACE ACROSS AMERICA 2017

TS 48 to TS 49

Cumberland, MD to Hancock, MD

The four major climbs in this section are tough. The last climb (up Sideling Hill) could be a walker. In Hancock the route is 2 blocks from the Potomac River. The river has dropped 1900 feet in the 90 miles since we crossed the North Branch in Gormanian!

This is the most difficult section of RAAM, measured in feet of climbing per mile. Fortunately there is a bit more downhill than uphill.

| <u>ref</u> | <u>mile</u> | <u>turn</u> | <u>elevation</u> |
